

OCHIN

BROADBAND NETWORK SERVICES & TELEHEALTH

Imagine a nationwide health care system connecting rural and urban hospitals and clinics across the country. At OCHIN and CTN we believe that all patients deserve access to the best possible health care, regardless of where they live. That's why we are proud to offer comprehensive network connectivity and telehealth solutions.

Broadband Connectivity

OCHIN and the California Telehealth Network (CTN)—now part of the OCHIN family of companies—help hundreds of hospitals and clinics connect to high-speed medical grade broadband networks. With a reliable, scalable, and robust broadband infrastructure, the path to integrated Health IT solutions is wide open.

- Save up to 65% on monthly broadband costs
- Private broadband network dedicated to health care facilities
- Clearinghouse of broadband services and providers
- Consultative broadband network design

Telehealth Solutions and Program Support

Our full suite of products and services support video conferencing and telehealth programs that improve access to quality health care for medically underserved and rural populations.

- Grant information and application filing for telehealth programs
- On-site telehealth program needs assessment
- Telehealth program design and implementation
- Consultative project management services
- Telemedicine equipment and clinical operations training
- Telehealth specialty provider matching
- eConsult, video conferencing hardware, software, and medical peripherals

Technical Support Services

Our technical support and compliance services help keep your program running and your data secure, including:

- Cybersecurity assessments, penetration testing, ongoing monitoring, and support
- Disaster recovery and business continuity solutions for HIPAA compliance
