

Clinical Pediatric Telemedicine Services for Outpatient Healthcare Organizations

The UC Davis Pediatric Outpatient Telemedicine Program offers health care providers and patients real-time remote consultation and evaluation through interactive, high-definition video and audio communication. The program enables children living in distant communities to receive care from UC Davis Children's Hospital pediatric subspecialists without traveling to Sacramento.

Services and service level commitments

Clinical telehealth consultations with a UC Davis pediatric specialist are available for:

- Behavior and development
- Cardiology
- Dermatology (store and forward)
- Endocrinology
- Gastroenterology
- Genomic medicine
- Hematology/Oncology
- Infectious diseases
- Nephrology, transplant and hypertension
- Physical medicine
- Otolaryngology (ear, nose and throat)
- Cleft and craniofacial
- Medical health and behavioral psychology
- Pulmonary/Sleep medicine

Outpatient consultations are scheduled weekdays between 8 a.m. and 5 p.m. Appointment length varies by specialty. To find specific clinical conditions appropriate for telemedicine consultation by specialty, as well as clinical information and equipment requirements, please visit cht.ucdavis.edu/clinic/telehealth/child.html.

Consultation notes are provided electronically within 24 hours.

Organizational benefits

Partnership with UC Davis' pediatric telehealth specialists benefits community hospitals and providers by offering:

- Quicker diagnosis and treatment planning for patients
- Reduced burden of travel to Sacramento for patients and families
- Predictable access to specialists for specific clinical conditions
- Ease of communication with UC Davis pediatric specialists
- Consultations documented in patients' medical records
